A CUT ABOVE THE REST

Are you looking for high-quality laser cutting that is cost-effective, accurate and innovative? Look no further than J & S Profiles who are specialists in laser cutting, folding and welding – and their new website means you can find what you need – quickly!

Using all the latest equipment and technology, J & S Profiles offer professional laser profiling and a full fabrication service from one-off prototypes to large batch work.

Mark Stancombe, J & S Profiles Director, said: "We are a one-stop shop for all your laser cutting needs. We do all our precision CNC laser cutting and welding on site so customers receive a flexible and personalised service – and this means better value for money too!

"We guarantee quick delivery on laser profiling and continually invest in new machinery to ensure we are at the forefront of technology. We have general sheet metal work and fabrication facilities including three press brakes, guillotines and coded welders, a flying optic laser and a punching machine – all under the one roof!"

Serving the aircraft, medical, engineering and shopfitting industries, J & S Laser Profiles laser cutting service caters for contractors and manufacturers throughout the UK and their expertise includes punching, folding, design, finishing and painting treatments. They also offer night-shift production and 'lights-out' production.

Established in 1988 and based in Southampton, J&S Profiles pride themselves on being an independent laser profiling company with a wealth of experience. By providing a complete CNC laser cutting service in-house, they can be flexible to your needs and by using state-of-the-art technology, they offer a quick turn-around and accurate profiling at competitive prices.
